COMMENTS ON STATEMENT OF REASONS FOR ALLOWANCE

Mail Stop Issue Fee
Commissioner for Patents
PO Box 1450
Alexandria, VA 22313-1450

Sir:

The Examiner indicates:

The prior art does not disclose applicant's claimed substrate assembly or electrical component, characterized by, in the context of all the claim limitations, for example, by a "spring-biased electrical contact that may be deflected into a via disposed at a location aligned with the spring-biased electrical contact", or "a plurality of vias opening onto a surface of a substrate and comprising a recess into which one of the spring-biased contacts may be deflected," or that "spring-biased contact," in the context of the totality of claim limitations, includes a "contact element" which is "configured to remove or puncture through a layer of contaminants formed on a exterior surface of a lead element extending from an IC

device, the contact element comprising a plurality of alternating grooves or ridges, a plurality of protrusions, or a roughened surface.”

Applicants concur with the reasons as stated by the Examiner insofar as they comprise a summary, and are exemplary and not limiting. However, the independent claims as allowed include other and different language than that specified by the Examiner, and the allowed dependent claims include other and further features and elements. Accordingly, the scope of the claims must be determined from the literal language of each as a whole, as well as equivalents thereof.
